Severity	Category	Location	Description	Fix
Critical	Security	examples/auth/index.js: 25	Potential hardcoded Hardcoded Secret/Password found.	Move sensitive credentials to environment variables and reference them via process.env.
Critical	Security	examples/auth/index.js: 50	Potential hardcoded Hardcoded Secret/Password found.	Move sensitive credentials to environment variables and reference them via process.env.
Critical	Security	examples/cookie-sessions/index.js:13	Potential hardcoded Hardcoded Secret/Password found.	Move sensitive credentials to environment variables and reference them via process.env.
Critical	Security	examples/mvc/index.js: 43	Potential hardcoded Hardcoded Secret/Password found.	Move sensitive credentials to environment variables and reference them via process.env.
Critical	Security	Global:1	Auth routes detected but no rate limiting middleware ('express-rate-limit', 'throttler', etc.) appears to be used.	Install and configure a rate limiter to prevent brute-force attacks on your authentication endpoints.
Critical	Security	examples/auth/index.js: 25	Hardcoded secret in session configuration	Use environment variables for sensitive credentials
Critical	Security	examples/auth/index.js: 50	Hardcoded secret in authentication	Use environment variables for sensitive credentials
Critical	Security	examples/cookie-sessions/index.js:13	Hardcoded secret in cookie session configuration	Use environment variables for sensitive credentials
Critical	Security	examples/mvc/index.js: 43	Hardcoded secret in session configuration	Use environment variables for sensitive credentials
Warning	Scalability	examples/mvc/index.js: 1	No rate limiting middleware used	Implement rate limiting to prevent brute-force attacks
